

...Have Your Car Checked

Many people bring their cars in for service in the fall to get ready for winter, but few bother to have the same car serviced before the hottest days of summer.

Our Safety and Reliability Evaluation can give you Peace-of-Mind driving this summer.

Of course, we'll be looking over tires, belts, and hoses. We'll also check your battery. It's essential that coolant levels be checked and that we evaluate your coolant for proper 50/50 mixture and ph. In addition, our ASE Certified Technicians will check under your hood, and under car. Including your brakes, tires, exhaust, lights, and a road test. Over 220 items in all.

Don't let unexpected car problems ruin your plans. Know the Condition of Your Vehicle. ☺

What's In It For You?

- ◆ A More Dependable Car
- ◆ A Car that Retains More "New Car Feel"
- ◆ Less Chance of A Costly Breakdown
- ◆ A Safer Car for You and Your Family
- ◆ A Car Worth More at Trade-In or Re-Sale
